1 Introduction

The fring-SIP Affiliate process will enable your users to download a fring client pre-configured with your SIP credentials. This document provides a detailed explanation of the process that you'll need to follow in order to offer your customers this client. The process includes registering with the fring network, activating your account, choosing one of two methods, iframe or Affiliate Individual Method, to include a fring download box on your site, and informing fring of process conclusion.

II Become a fring-SIP affiliate

There are four steps to becoming a fring-SIP affiliate:

Step 1: Register with fring

The SIP Affiliate registration page provides the registration form and documentation you will need to set-up your account and create a fring Affiliate Service-ID.

fring
it's fringing freedom!

fring is | [download](#) | [community](#) | [fun](#) | [blogs](#) | [support](#)

partners | [fring partners](#) | [affiliate registration](#) | [partner form](#) | [login](#)

become a fring-SIP affiliate

Follow the 4 steps below in order to become fring-SIP affiliate:

- 1 **Register** with fring
- 2 **Activate** your account
- 3 **Add fring download box** to your site
- 4 **Inform fring** about process completion

[see fring implementation guide](#)

1 Register with fring.

SIP service provider

Your Email:

Password:

24x24 pixel's service icon: [Browse...](#) [see example](#)

32x32 pixel's service icon: [Browse...](#) [see example](#)

Service web address:

Default proxy:

Terms of service: [AFFILIATE PROGRAM AGREEMENT](#)

☐ I have read and agreed to the [affiliate program agreement](#) above

What you will get

A fring client pre-configured with your service settings and your customer's credentials

fring enables SIP service providers, like you, to offer your customers a fring client that is pre-configured with your service settings and your customer's credentials (user name, password & proxy) so that once a user downloads fring, calls can immediately be placed on your network.

Additional revenue opportunities

Now your subscribers can place calls through your SIP service while on the go from their mobile handsets, enabling you to potentially gain a great new revenue source.

Please fill-in the required information and after hitting JOIN, we will provide you with information and code examples that you can place on your website.

The registration page is shown above.

The following parameters are needed to register with fring:

1. **Your email** – Your email identifies you as the administrator of the service and is used for subsequent login to manage and update the configuration. We will send a Service-ID to this email address.
2. **Password** – Your personal password will enable you to secure access into your account.
3. **Provider name** – A short name of up to 10 characters that enable users to identify your service.

4. **Server description** – A short paragraph of up to 250 characters that describes your service. Used when end-users are looking to identify specific services to choose in fring's service catalog.
5. **Default Proxy** – An IP address or a DNS name of your SIP proxy servers. This parameter is used in the event that it is missing from the specific user request.
6. **Small icon** – A BMP image of 16*16 pixels with an icon of your service.
7. **Large icon** – A BMP image of 34*34 pixels with an icon of your service. Both icons will be used to indicate to the user that an activity is being processed over your network. Note, this feature is not supported in all handset models.
8. **Legal** – Please read the Affiliate Program Agreement, Terms of Service and License Agreement **carefully** and approve them by clicking on the checkboxes.

Step 2: Activate your account

After filling the data above, press on 'Join' to send us the filled form.

You will then get an automatic email from us with your unique Service-ID.

The Service-ID together with your password can be used in the future for modifying the parameters for this service. In the future, you can login to your account at <http://reg.fring.com/partners/login/default.php>.

Step 3: Add fring download box to your site

You may now start programming your web site to provision fring for your customers as indicated in **Step II** below.

Step 4: Inform fring about process completion

The final approval for your service is subject to a verification process. This process may involve interaction with fring's customer support personnel.

Upon approval, you'll receive an email confirmation from us stating that your service is up and running.

II Programming your website

Users will be able to download fring from your SIP site by filling a simple form on the web that includes the user's mobile number and identification information. An example of the form as it appears today on our website is available at www.fring.com/download/

Upon submitting the form, the web server should generate an HTML POST request with the parameters required by fring AND specific parameters for the SIP user identification.

This request hits our servers and initiates the following sequence –

1. An SMS with a URL to download the application is sent to the user.
2. The Web page is re-directed to the fring website to complete the rest of the registration process.
3. Upon finishing fring installation, the user's specific SIP parameters will be transferred automatically to the application and the user can then register with fring.

The following are two available methods for implementing the download process:

Option 1: Graphical method

One way to develop your HTML page is by using an IFRAME that is downloaded from the fring servers and provides a similar experience as the one available today on the fring website.

This method is protected by a secure connection (SSL).

The **IFRAME** loads the form and attaches it to the SIP variables and data in the query string:

[https://www.fring.com/download/form.asp?\[Variable1=Value1&Variable2=Value2...\]](https://www.fring.com/download/form.asp?[Variable1=Value1&Variable2=Value2...])

[where \["Variable name"\]=>"Value"](#)

This will insert the username, password and DNS of SIP to the form in hidden fields so after the user fills in all of the personal information in the form (mobile number, country, etc) and submits it, the SIP's parameters will be sent with them.

HTML example (Some coding is required to provide the user/pass/DNS/partner):

```
<%  
'Here the Partner will fetch the user details to sent to us  
Dim user, pass, DNS, partner  
user = "<user-id in SIP>"  
pass = "<user-password in SIP>"  
dns = "<provider dns.SIP>"  
partner = "<partner-ID>"
```

```

source = "<provider-name>" (optional parameter)
%>
<!DOCTYPE HTML PUBLIC "-//W3C//DTD HTML 4.01 Transitional//EN">
<html lang="en">
<head>
<TITLE>fring-SIP download form</TITLE>
<style type='text/css'>
body { width: 100%; height: 100%; }
.myframe { height: 100%; width: 100%; white-space: nowrap; overflow: hidden; border:
none; }
</style>
</HEAD>
<BODY>
<iframe FRAMEBORDER="0" scrolling="no" class='myframe'
src='https://www.fring.com/download/form.asp?pa=<%=partner%>&u=<%=user%>&p
=<%=pass%>&d=<%=dns%>'>&s=<%=source%></iframe>
</BODY>
</HTML>

```

Note:

To change the size of the iframe, edit the .myframe style command to:
.myframe { height: <your size>px; width: <your size>px; white-space: nowrap; overflow:
hidden; border: none;

Option 2: Affiliate individual method

Another method suggested below enables you to create a web experience with your own look & feel. In this method, you can provide your own data entry format and send the fring server a complete POST request with the data required.

This method is protected by a secure connection (SSL).

1. Make a form that will send a POST request to: <http://reg.fring.com/app/newproc.php>
2. Make sure the following parameters are being sent:
 - firsttime – value should be your company name.
 - source – provider-name (the same one you filled in your registration form).
 - pa – Affiliate Service-ID.
 - u – user-id in SIP.
 - p – user-password in SIP.
 - d – provider dns.SIP.
 - manufacture_type – choose manufacturer type; if unknown use "NOMAN".
 - handset_type – choose handset type; if unknown use "NOMAN".
 - location – Country-ID of the user (must be based on the list provided below).
 - mobileNumber0 – the user telephone country code (Example, 972 for Israel).
 - mobileNumber – the user mobile number (number should include area code; and may include the country code as well)
 - email – the user's email address.

For the convenience of the end-user, you can refer them to a fring webpage that shows a full list and images of the handsets we support:

<http://www.fring.com/download/supportedhandsets.asp>

HTML example (Some coding is required to provide the user/pass/DNS/partner):

```
<form method="POST" action=http://reg.fring.com/app/newproc.php>
<input type="hidden" name="firsttime" id="firsttime" value='<your company name>'>
<input type='hidden' name='source' value='<provider-name>'>
<input type='hidden' name='pa' value='<Partner-ID>'>
<input type='hidden' name='u' value='<user-id in SIP>'>
<input type='hidden' name='p' value='<user-password in SIP>'>
<input type='hidden' name='d' value='<provider dns.SIP>'>
<input type='hidden' name='manufacture_type' value='NOMAN'>
<input type='hidden' name='handset_type' value='NOHAND'>
<input type='hidden' name='location' value='Country-ID'>

<input type="text" name="mobileNumber0" id="mobileNumber0">
<input type="text" name="mobileNumber" id="mobileNumber">
<input type="text" name="email" id="email">
<input type="submit" value="Join">
</form>
```

Country-ID

The following is the list in HTML format for the Country-Id field

```
<select name="location" style="width:260px;height:18;">
  <option value="nocountry" > Choose your country </option>
  <option value="Afganistan" > Afganistan </option>
  <option value="Albania" > Albania </option>
  <option value="Algeria" > Algeria </option>
  <option value="American Samoa" > American Samoa</option>
  <option value="Andorra" > Andorra </option>
  <option value="Angola" > Angola </option>
  <option value="Anguilla" > Anguilla </option>
  <option value="Antarctica (Casey)" > Antarctica (Casey) </option>
  <option value="Antarctica (Scott)" > Antarctica (Scott) </option>
  <option value="Antigua" > Antigua </option>
  <option value="Argentina" > Argentina (5411) </option>
  <option value="Argentina1" > Argentina (549) </option>
  <option value="Argentina2" > Argentina (54) </option>
  <option value="Armenia" > Armenia </option>
  <option value="Aruba" > Aruba</option>
  <option value="Ascension Island" > Ascension Island </option>
  <option value="Australia" > Australia </option>
  <option value="Austria" > Austria </option>
  <option value="Azerbaijan" > Azerbaijan</option>
  <option value="Bahamas" > Bahamas </option>
  <option value="Bahrain" > Bahrain </option>
  <option value="Bangladesh" > Bangladesh </option>
  <option value="Barbados" > Barbados </option>
  <option value="Belarus" > Belarus </option>
  <option value="Belgium" > Belgium </option>
  <option value="Belize" > Belize </option>
  <option value="Benin" > Benin </option>
  <option value="Bermuda" > Bermuda </option>
  <option value="Bhutan" > Bhutan </option>
  <option value="Bolivia" > Bolivia </option>
  <option value="Bosnia" > Bosnia </option>
  <option value="Botswana" > Botswana </option>
  <option value="Brazil" > Brazil </option>
  <option value="British Virgin Islands" >British Virgin Islands </option>
  <option value="Brunei" > Brunei </option>
  <option value="Bulgaria" > Bulgaria </option>
  <option value="Burkina" > Burkina </option>
  <option value="Burundi" > Burundi </option>
  <option value="Cambodia" > Cambodia </option>
  <option value="Cameroon (Republic of)" > Cameroon (Republic of) </option>
  <option value="Canada" > Canada </option>
  <option value="Cape Verde Islands" > Cape Verde Islands </option>
  <option value="Cayman Islands" > Cayman Islands</option>
  <option value="Central African Republic" > Central African Republic </option>
  <option value="Chad Republic" > Chad Republic </option>
